

HCFAI WEBINAR

Farm Tech Meets Animal Care

Explore the Future of Farming at the HCFAI Webinar ~ Where Technology Meets Animal Welfare

Join us as we unravel the complexities of Digital Agriculture and Artificial Intelligence in the realm of farm animal care.

Is technology genuinely enhancing animal welfare, or is it primarily a tool for boosting farm productivity? Delve into the dynamic world of Human-Computer Farm Animal Interactions (HCFAI) and explore how cutting-edge technologies are reshaping the landscape of modern farming.

This thought-provoking session will address vital questions -

Are we truly bettering the lives of farm animals with innovative technology, or simply driving greater productivity? How can digital agriculture practices be ethically aligned with the quest for sustainable and profitable farming? What role do farmers play—are they the stewards of animal welfare or merely focused on maximizing efficiency?

WEBINAR AGENDA

3 JUNE 2024
Online webinar

Speakers

9:00 – 9:15 AM Welcome Remarks

Suresh Neethirajan | Dalhousie University

Stacey Scott | University of Guelph

9:15 – 10:15 AM Keynote

Dr. Marian Dawkins | Oxford University

10:15 – 11:15 AM Ethology, Human Psychology and Robots in Animal Farming

Dr. Xavier Boivin | INRAE France

11:15 – 12:15 PM Animal-Computer Interaction

Dr. Clara Mancini | Open University, UK

12:15 – 1:00 PM Bio-break

--- Break ---

1:00 – 2:00 PM Technology Access for Livestock Production

Dr. Désirée Gellatly | Olds College | Alberta, Canada

2:00 – 3:00 PM Veterinary Social Work

Dr. Elizabeth Strand | University of Tennessee | USA

Shari Van de Pol | Founder and CEO - CATTLEytics

3:00 – 3:50 PM Panel Discussion

Kelly Somerville | Industry Services Manager | LRIC-Guelph

Kris Petitt | Mistyglenn Creamery

3:50 – 4:00 PM Closing & Gratitude Remarks

Suresh Neethirajan | Dalhousie University
